

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) An electronic market system for trading of securities comprises:
a plurality of client stations for entering quotes for securities; and
a server computer process that receives quotes from the client stations, aggregates the quotes and causes a total of all aggregated quotes to be displayed for each of a plurality of price levels on the client systems and causes a current quote window to be displayed on the client systems in proximity to the aggregated quotes.

2. (Canceled)

3. (Original) The system of claim 1 wherein the aggregated quotes at the plurality of price levels are rendered in an aggregate window of a graphical user interface displayed on the client systems.

4. (Original) The system of claim 1 wherein the plurality of price levels are dynamically changeable depending on market conditions.

5. (Original) The system of claim 1 wherein the aggregate window displays aggregate interest for both sides of a market.

6. (Currently Amended) The system of claim 1 wherein the ~~system~~ server ~~further~~
~~comprises:~~

~~a montage quote manager process to update~~ the aggregate window.

7. (Currently Amended) The system of claim 1 wherein the server produces a special quote for display in the current quote window montage, the special quote comprising further ~~comprises~~ an identifier, and a size that represents the aggregate size of all non-attributable quotes/orders at the best bid/best offer displayed in the current quote montage.

8. (Previously Presented) The system of claim 7 wherein the identifier is displayed for both sides of the market.

9. (Currently Amended) The system of claim 1 wherein three price levels of aggregated quotes interest are displayed, with one being the price levels corresponding to the inside quote and the others being the next best price levels in the system for each side of the market.

10. (Currently Amended) A graphical user interface for an electronic market for trading products comprises:

an aggregate window, having a first plurality of indicators, each indicator displaying that displays a totals of aggregated interest of a second plurality of market participants that exists in the electronic market at each indicator being for one of a third plurality of price levels of a product traded in the market; and

a current quote window disposed adjacent the aggregate window; and with the indicators being controls that when selected by a user allows the user to enter orders to execute against interest represented by the indicator.

11. (Canceled)

12. (Currently Amended) The graphical user interface of claim 10 ~~further comprising a current quote window disposed adjacent the aggregate interest window and~~ wherein said current quote window displays quotes that are ~~may be~~ negotiable quotes of participants in the system.

13. (Currently Amended) The graphical user interface of claim 10 ~~further comprising a current quote window disposed adjacent the aggregate interest window and~~ wherein said current quote window displays quotes that are attributable quotes of participants in the system and further comprises a special quote that represents total aggregate of non-attributable quotes at a current market level included in an indicator in the aggregation window.

14. (Original) The graphical user interface of claim 10 wherein three price levels of aggregated interest are displayed, with one being the price levels corresponding to the inside quote and the others being the next best price levels in the system for each side of the market.

15. (Original) The graphical user interface of claim 14 wherein the price levels are dynamically changeable depending on market conditions.

16. (Currently Amended) A method of operating an electronic market for trading products comprises:

receiving, from client systems attributable and non attributable quotes for a product;
aggregating the non-attributable interest quotes in the product to provide a total of all non-attributable interest at a plurality of price levels; and
sending from the electronic market data to render a user interface on displays of the client systems, the user interface displaying totals of all interest for a plurality of price levels on the client systems.

17. (Currently Amended) The method of claim 16 wherein sending further comprises ~~comprising:~~

sending data to displaying a current quote window on the client systems in proximity to the totals of all interest, the current quote window displaying attributable quotes for the product
~~the aggregated non-attributable interest in a window for at least one of the plurality of price levels of the product traded in the market.~~

18. (Currently Amended) The method of claim ~~17~~ 16 wherein sending sends data to displaying displays three price levels with one being the price levels corresponding to an the inside quote and the others being the next best price levels in the system for each side of the market.

19. (Currently Amended) The method of claim ~~17~~ 16 wherein the price levels are dynamically changeable depending on market conditions.

20. (Currently Amended) The method of claim 17 further comprising:
producing a special quote that represents the total of non-attributable quotes at the inside price for each side of a market in the product and wherein sending further comprises:
sending data to displaying comprises:- display the special quote in the producing a graphical user interface including an aggregate window that displays the aggregate quotes.

21. (Original) The method of claim 17 wherein displaying further comprises:
producing a current quote window disposed adjacent the aggregate window.

22. (Currently Amended) The method of claim 17 wherein displaying further comprises:
producing a current quote window disposed adjacent the aggregate window and wherein said current quote window displays ~~quotes that may be~~ negotiable quotes of participants in the system.

23. (Currently Amended) The method of claim 17 wherein the receiving further comprises:
receiving attributable and non attributable orders and quotes for the product; aggregating further comprises:
aggregating the non-attributable orders and quotes in the product to provide the total of all non-attributable interest at the plurality of price levels
displaying further comprises:

~~producing a current quote window disposed adjacent an aggregate window and wherein said current quote window displays quotes that may be negotiable quotes of participants in the system and further comprises a special quote that represents total aggregate quotes at a current market level displayed in the aggregate window.~~

24.(Currently Amended) A computer program product residing on a computer readable medium for use in trading a financial product, the computer program product residing on a computer readable media comprising instructions for causing a computer to:

receive non-attributable interest in the form of quotes and/or orders for a financial product traded in an electronic system;

aggregate non-attributable interest in the financial product to provide a total of all non-attributable interest at a plurality of price levels; and

configure the data corresponding to the total of the non attributable interest at the plurality of price levels to render the totals to an output device.

25-67. (Canceled)

68. (New) The system of claim 1 wherein the quotes are attributable quotes to a market participant or non-attributable quotes to a market participant, that entered the quote.

69. (New) The system of claim 1 wherein the server that receives quotes receives both attributable and non-attributable quotes.

70. (New) The system of claim 1 wherein the current quote window includes a list of attributable quotes in a current quote montage.

71. (New) The system of claim 1 wherein prices in each of plurality of price levels dynamically changes depending on market conditions.

72. (New) The system of claim 1 wherein the aggregated quotes are displayed in an aggregate window for both sides of the market.

73. (New) The system of claim 1 wherein the price levels are price levels of a financial security traded in the market.

74. (New) The system of claim 1 wherein the current quote window includes attributable quotes of participants in the system and a size indicator quote that represents a total non attributable aggregate quote size at a current market level.

75. (New) The graphical user interface of claim 10 wherein the graphical user interface displays totals of attributable and non-attributable quotes.

76. (New) The graphical user interface of claim 75 wherein the current quote window includes a list of attributable quotes in the current quote window.

77. (New) The graphical user interface of claim 75 wherein the prices of the plurality of price levels in the controls dynamically change depending on market conditions.

78. (New) The graphical user interface of claim 75 wherein the price levels are price levels of a financial security traded in the market.

79. (New) The graphical user interface of claim 75 wherein the current quote window displays a special quote that represents total aggregate quotes at a current market level displayed in the aggregate window.
